

5 reasons to choose the HAAKE MARS iQ Rheometer

Save up to 20%

Thermo Scientific™ HAAKE™ MARS™ iQ Rheometers deliver more iQ for your QC! This rheometer series provides extensive flexibility and ease-of-use for daily quality control processes.

1

Simplified, Convenient Operation

- Built-in “assist” functionalities simplify operations and prevent measuring failures. These include “Connect Assist” for quick coupling of measuring geometries and temperature modules with automatic recognition
- Robust, durable rheometer frame design provides greater stiffness, ultra-precise lift control, high vibrational damping and chemical resistance to ensure reliable and reproducible measurements

4

Worldwide support

- Global certified specialists offer reliable service and application support as well as comprehensive rheology training

2

Simply click or touch for results

- The rheometer is fully software controlled using Thermo Scientific™ HAAKE™ RheoWin™ PC Software optimized for a lab's individual requirements
- Option to operate via the 7” multilingual color touchscreen to launch measuring methods directly from the instrument
- Easily incorporate standard operating procedures (SOPs) for reliable results, regardless of user

5

Short-term savings, long-term efficiency*

- Save 20% on a service contract plus a free year of additional warranty
- 10% savings on standard rheometer accessories
- In addition, for existing customers, a single-user license for HAAKE RheoWin Software free of charge

3

New capabilities for your QC

- A sensitive normal force sensor enables extended measuring capabilities in the QC environment, including texture or tribology measurements
- Expand analytical capabilities with the broad range of measuring geometries, temperature modules and measuring cells for analyzing water-like to semi-solid samples
